"Built for strength, crafted for longevity,our pontoons deliver premium quality and custom finishes to elevate your waterfront experience."

About Us

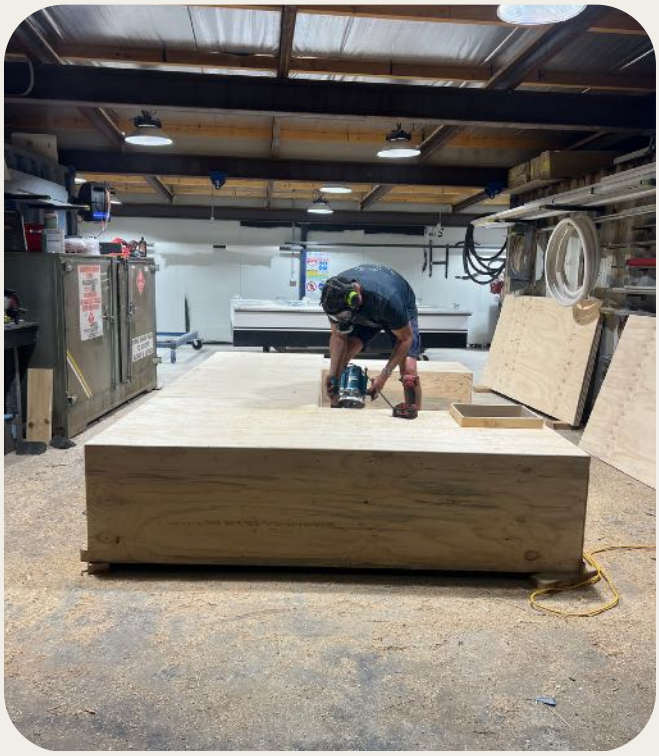
Our Story

Founded in 2018 by Ned Doherty, N.G.D Waterworks was born out of a passion for quality craftsmanship and a vision to meet the high demand for premium waterfront construction services.

After completing his trade in carpentry and joinery and gaining experience in residential construction, Ned recognised a gap in the market for companies that could deliver high-end, bespoke solutions for waterfront property owners.

Ned's commitment to excellence and innovation has been the driving force behind our success, establishing N.G.D Waterworks as a trusted name in marine construction.

Today, N.G.D Waterworks operates from our premises in Kurnell, NSW, with an office in Taren Point, servicing clients along the east coast of Australia.



Over the years, we've expanded our services to include barge hire, custom pontoon manufacturing for direct sale and wholesale, specialist boardwalk construction solutions, and solutions for tight and difficult access projects. With a focus on both residential and commercial markets, N.G.D Waterworks continues to grow, offering a wide range of waterfront construction services designed to meet the unique needs of each project.

At N.G.D Waterworks, we are deeply committed to environmental sustainability and marine protection. We carefully plan and execute every project to minimise disruption to aquatic ecosystems and follow best practices to ensure long-term environmental preservation.

Our Pontoon's

At NGD Waterworks, we take pride in building pontoons that stand up to the toughest conditions. Each pontoon is constructed with a focus on durability, strength, and longevity. The process begins with the framing, where we use premium Oregon timber (100 x 50mm) for a solid, reliable structure. This framing is then sheathed with plywood, which is securely fastened using stainless steel screws.

Over the years, we've continually refined our design and process, fine-tuning every detail to ensure that we're delivering the best possible product. Our team's experience and commitment to improvement have helped us create pontoons that outperform industry standards, offering unmatched durability and performance.
Once the framing and sheeting are complete, we apply two layers of 450GSM Chop Strand fiberglass and Vinyl Ester resin to coat the pontoons. This combination of materials provides superior strength, impact resistance, and weatherproofing, making them ideal for the harsh conditions of marine environments. After the fiberglass layers have cured, each pontoon undergoes a thorough sanding and preparation process, ensuring a smooth surface for the next step: painting. The pontoons are then painted in your selected color(s), offering a clean, professional finish that not only looks great but also enhances the pontoons' resilience against the elements.

In the final stage of construction, the pontoons are fitted off with each client's chosen specifications, as outlined in the ordering system in this catalogue. This ensures a clear understanding of what's being delivered by our team and allows for precise customisation. Custom finishes and any other client-specific requirements, are added to ensure the pontoon meets your exact needs.

Once all the construction and finishes are completed, the pontoons undergo a comprehensive quality assessment. This step ensures that every pontoon meets our high standards for performance and durability before it's handed over to the client. We don't just build pontoons; we build confidence that your investment will perform for years to come.

ORDERING PROCESS

THE FOLLOWING OPTIONS ARE TO BE CHOSEN AS PART OF OUR ORDERING PROCESS

1. PONTOON SHELL: START WITH A ‘PONTOON SHELL’

2. DECK CONNECTION: CHOOSE BETWEEN FLUSH OR TOP MOUNT DECK CONNECTIONS, CONSIDERING THE BENEFITS OF EACH OPTION.

3. CLEAT MATERIAL: DECIDE BETWEEN STAINLESS STEEL OR CAST ALLOY CLEATS,

4. FENDER SYSTEM: SELECT FROM OUR RANGE OF FENDERING OPTIONS

5. OPTIONAL EXTRA’S
